INTRODUCTION

EDITORIAL STATEMENT

2017 was something of a milestone for **PES**. In May, the magazine celebrated its 20th birthday and as I reflect on its past – and indeed its future – one thing's pretty certain: like the industry it represents, things are always changing and evolving.

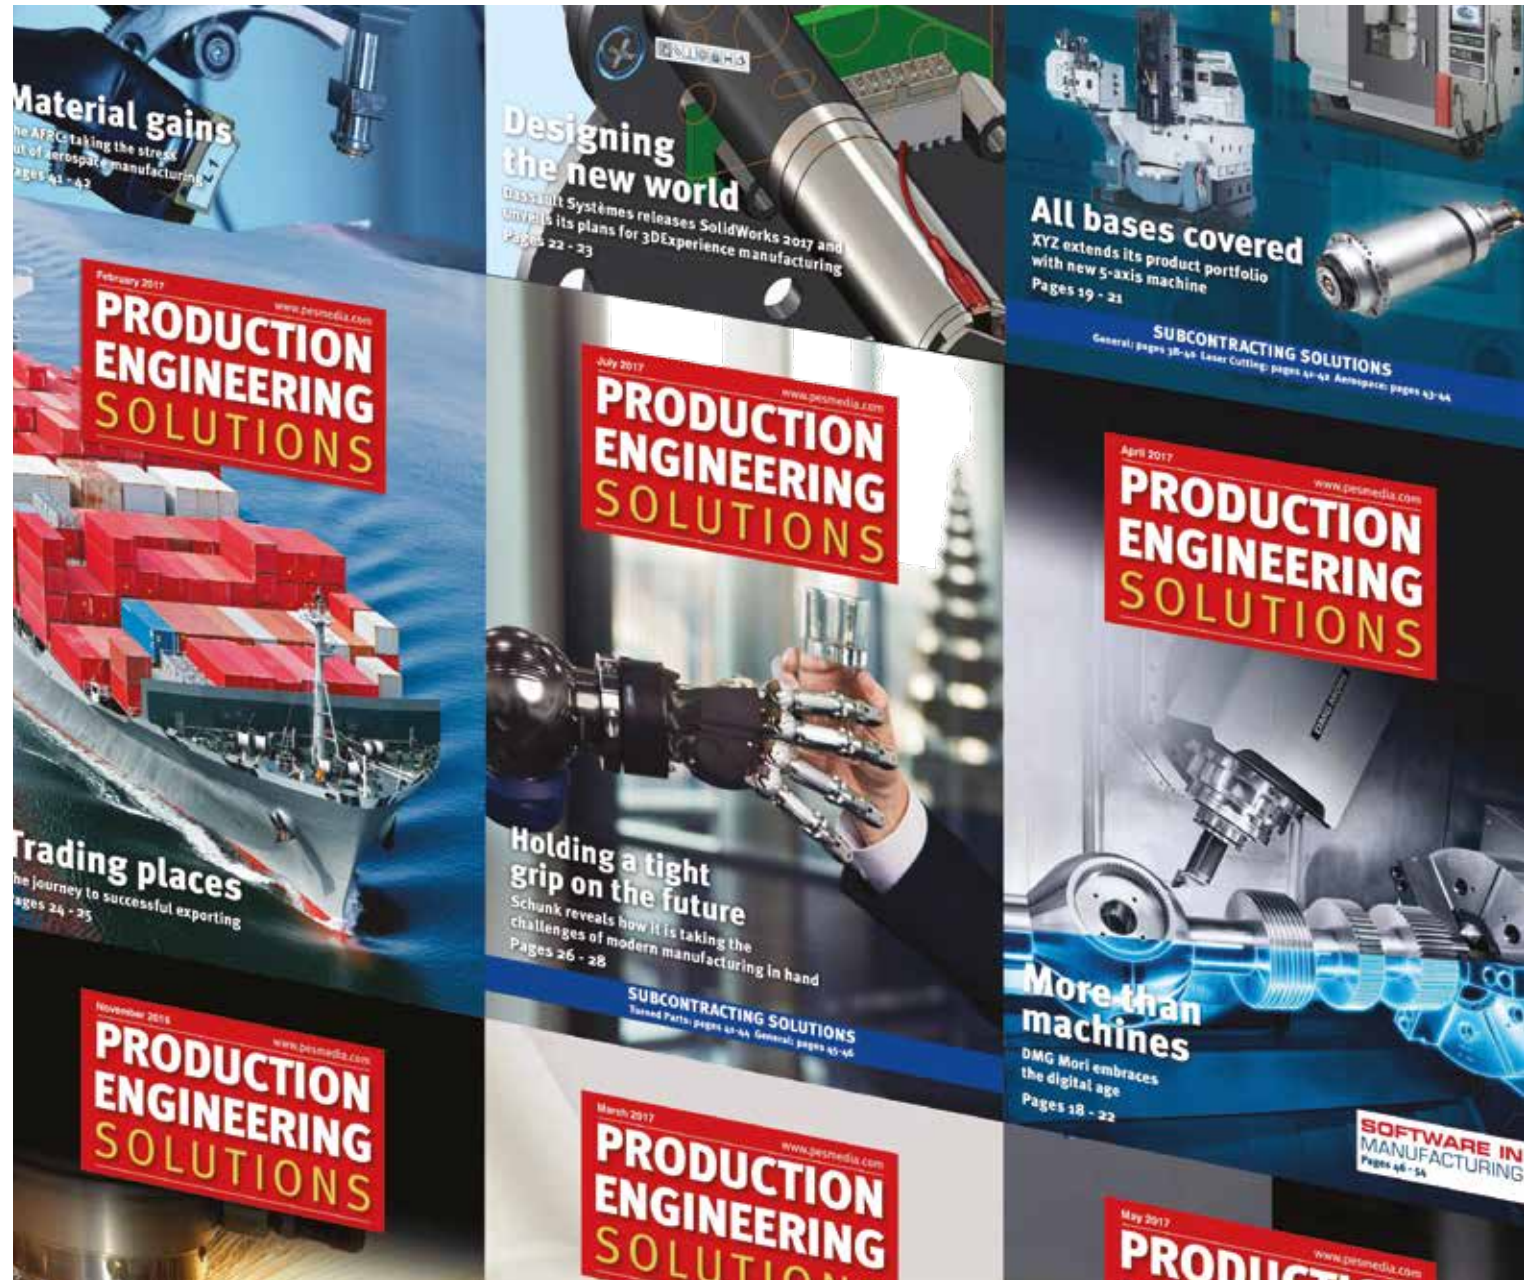

Back in 1997, CNC was revolutionising the manufacturing landscape; now there's a seismic shift towards automation and connectivity with terminology like Big Data, The Internet of Things and Industry 4.0 dominating conversations. And today, as we strive towards greater productivity and efficiency, we're not just concerned with removing material – we add it as well!

As a brand **PES** also continues to evolve. The printed magazine remains a cornerstone of our portfolio but the past year has seen further, significant strides in our digital presence.

Since relaunching the **PES** website in April 2016, page views have doubled and visitor numbers have trebled. Broadening our media platform with video content, email marketing, social media, and utilising search engine optimisation has had a lasting impact on our digital offering, enhancing our industry coverage and engaging with more readers than ever before.

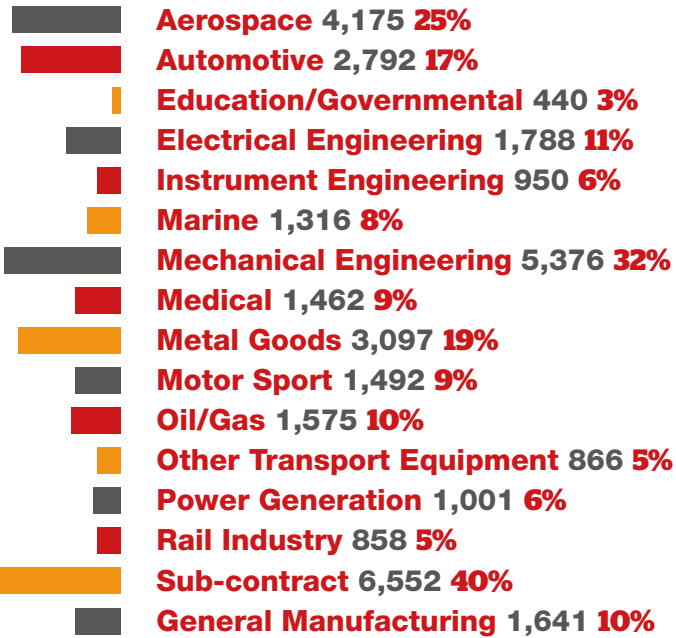

15,054 ABC (Audit Bureau of Circulations) audited monthly subscribers to the printed magazine + 1,492 recipients of the digital version + significant year on year increases in web traffic is a winning combination in anyone's book!

Dave Tudor
