INTRODUCTION

EDITORIAL STATEMENT

Since its inception in 1997, **PES**' unwavering commitment to bringing readers the latest industry news, product releases, application stories and topical articles has been a cornerstone of its success.

You can also be reassured that we take the quality of our circulation responsibilities very seriously. What does that actually mean? Well, last year we sent more than 35,000 emails, made more than 23,000 phone calls and invested in excess of 1,500 hours verifying the quality of our circulation database across the entire **PES** brand.

Not only that, with the printed magazine circulation, we undertake an independent ABC audit every year to verify its authenticity. For readers and advertisers, strictly controlled circulation is very important. More than 20,000 recipients – in print and digitally – receive **PES** every month.

But of course media today is very much a multi-faceted business. We've invested heavily in our digital offering and social media presence in recent years – in fact, the amount of digital readers visiting the **PES** website per month has quadrupled since our digital relaunch in 2016. Similarly, by utilising different methods of coverage, including social media and achieving recognition on other media outlets, the **PES** digital platform and our clients' digital advertising have reached a much larger audience than ever before.

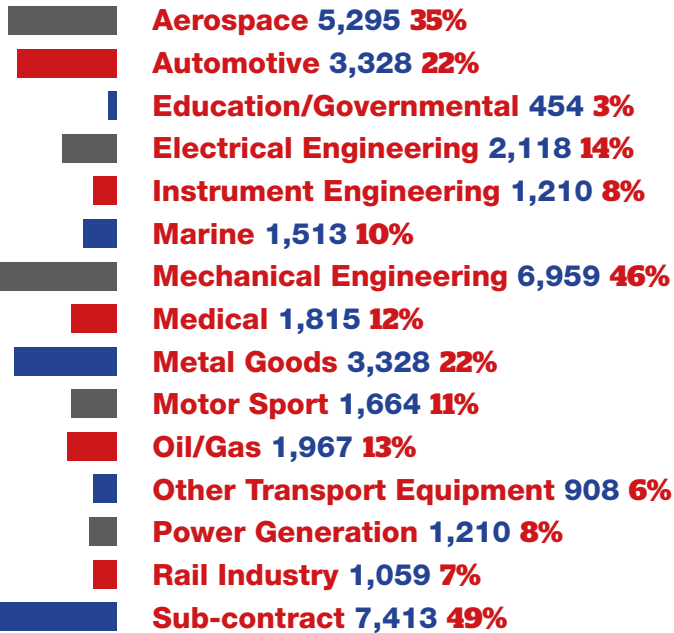

A handwritten signature in black ink that reads "Dave Tudor".
