

A person is pouring a white liquid from a large, worn metal bucket into a large, modern industrial machine. The machine has a circular top section with two compartments. The scene is set in a laboratory or industrial environment.

Still filling manually?

REMOVE THE ELEMENT OF DOUBT

Once set WillFill automatically tops up your MWF

When the quality of the metalworking fluid changes, Will Fill will automatically adjust or notify you when action is needed. The device measures and reports on :-

- pH Levels.
- Concentration of oil/water mix.
- EC (Hardness of water).
- Coolant temperature
- Oil usage.
- Water usage.
- Coolant level.

Help ensure your coolant is always in optimum condition.
